J. J. Keller & U.S. Compliance

Environmental, Health & Safety Compliance Monitoring System

An ongoing commitment to third-party validation of EH&S compliance from knowledgeable experts

J. J. Keller and U.S. Compliance offer a Compliance Monitoring System (CMS) to give you an unbiased assessment of your compliance status that you can use to better manage your internal EH&S efforts.

HOW THE PROGRAM WORKS:

Qualified EH&S professionals will visit your facilities at least once per year, performing a detailed assessment of your environmental (EPA) and/or safety & health (OSHA) compliance status. Site-specific results and recommendations will be provided and broken into the following four key areas:

1. Site Summary
2. Facility Inspection Rating
3. Policy/Training Rating
4. Corrective Action Item List

At the end of each year, we'll get together to discuss ideas for continuous improvement to your CMS, as well as incorporating any regulatory and internal (i.e. personnel, process, equipment, etc.) changes.

This program provides a significant benefit to organizations that are looking for:

- Objective, third-party evaluation of EH&S compliance
- A consistent compliance monitoring system across multiple locations
- A simple, easy-to-understand tool
- A proven method to drive accountability and "action" to resolve compliance gaps
- Access to professional support and advice throughout the year!

TYPICAL HEALTH & SAFETY TOPICS EXAMINED:

- Accident Prevention/I2P2
- Bloodborne Pathogens
- Confined Spaces
- Ergonomics
- Emergency Response Plans
- Hazard Communication
- Hearing Conservation
