

Hazardous Materials Compliance Assessment

Protecting Companies that Handle, Package, Ship, Receive or Transport Hazardous Materials

The J. J. Keller® Hazardous Materials Compliance Assessment provides a review of your company's hazardous materials and dangerous goods transportation program. Your Consultant will evaluate your compliance with domestic and/or international shipping/transportation regulations, and advise of any compliance gaps. You'll receive a detailed summary along with recommendations for improving your program.

Hazardous Materials Compliance Assessment includes:

Stakeholder Interviews:	Documentation Review:	Visual Process Review:	Reporting & Discussion:
Your Consultant meets with your key personnel to identify and discuss policies, procedures, and other important information that should be considered during the assessment.	Your Consultant evaluates existing procedures for receiving, procuring, handling, and shipping of hazardous material products.	Your Consultant reviews the hazardous material processes that impact employee activities, and helps you identify and properly classify your products.	Upon completion of the assessment, your Consultant provides a written summary and discusses risk areas, compliance improvement recommendations and offers best practice solutions.

Benefits:

- Understand how the hazardous materials regulations apply to your organization
- Receive a comprehensive review of policies, procedures, training, and other important information to ensure compliance with hazmat regulations
- Identify process and compliance gaps to better understand where to focus attention
- Receive a written executive summary with an action plan to improve compliance
- Get answers to your questions from a J. J. Keller compliance expert.
