

Now available with optional **SCANNABLE LOG AUDITING**. Save time and improve efficiency.

J. J. Keller® Encompass® Compliance Edition

Improve Hours of Service compliance and manage fleet compliance

The **Compliance Edition** of the Encompass® system **with ELogs** gives you paperless fleet safety and compliance with the benefits of ELogs and automated log auditing. Thousands of fleets use the **Compliance Edition** to manage driver and vehicle compliance. This edition gives fleet managers extraordinary insight to fleet operations and transparency to information at all compliance levels, even across multiple locations.

Manage Complex Regulatory Requirements with the Encompass® System for Increased Efficiencies

- **Paperless Recordkeeping** — Increases productivity with electronic storage of DQ files, alcohol & drug files, vehicle titles and maintenance, accident tracking, training files and more.
- **Automated Driver Duty Status & Vehicle Inspection** — Monitored by our system against Parts 395 and 396, ensuring that hours of service recordkeeping is accurate and inspection details are recorded per regulatory requirements.
- **ELogs On a Smart Device:** Use your drivers' smart device to download the J. J. Keller Mobile® app, or use the J. J. Keller® Compliance Tablet™ and eliminate the hassle of negotiating a data plan. Updates on the fly. Includes EDVIRs.
- **Vehicle Legalization** — Track and review unit-specific documents.
- **Optional Automated Fuel Tax Reporting** — Save time with J. J. Keller's ELD. Our automated option collects GPS data for miles driven in each state and province OR you can choose to manually enter trips.

The Encompass® system with ELogs delivers:

- **Increased Drive Time** — The Encompass® system records drive time by the minute, not in the 15 minute increments on a paper log grid. Drivers maximize every minute of their driving day.
- **Instant Access to Available Drive Time** — Anytime access to simplified pie charts shows drivers how many hours they have available to drive today and weekly. Alerts remind them to take their 30-minute break.
- **No Roadside Inspection Hassles** — Roadside Inspection Mode locks out unrequired data and allows the driver to show only their current and previous seven days of logs.
- **Reduced Paper Work** — No more filling out a log book! At the touch of a finger drivers log in, do their pre-trip, record their 30 minute break and log off. It's that easy.

Your Encompass® Compliance Edition subscription includes:

- **Drug & Alcohol Program Management** — Manage random selections and record all test results and paperwork.
- **Dashboard Alerts** — Immediately identify compliance areas that require attention.
- **Driver Training Recordkeeping** — Track both initial and ongoing driver training files.
- **Log Auditing** — For electronic logs, scannable logs, and manual entry. Includes unique state and industry rule sets.
- **Background Checks** — Integrated background report ordering/reporting.
- **CSA Fleet Scorecard and Knowledge Center** — Import FMCSA roadside inspection information.
- **Customizable Reporting Templates** — Based on company locations, driver and unit types, and more.
- **Vehicle Maintenance** — Schedule and track preventive maintenance; manage parts inventory and repair orders.
