

Now available with optional **SCANNABLE LOG AUDITING**. Save time and improve efficiency.

# J. J. Keller® Encompass® ELogs Edition

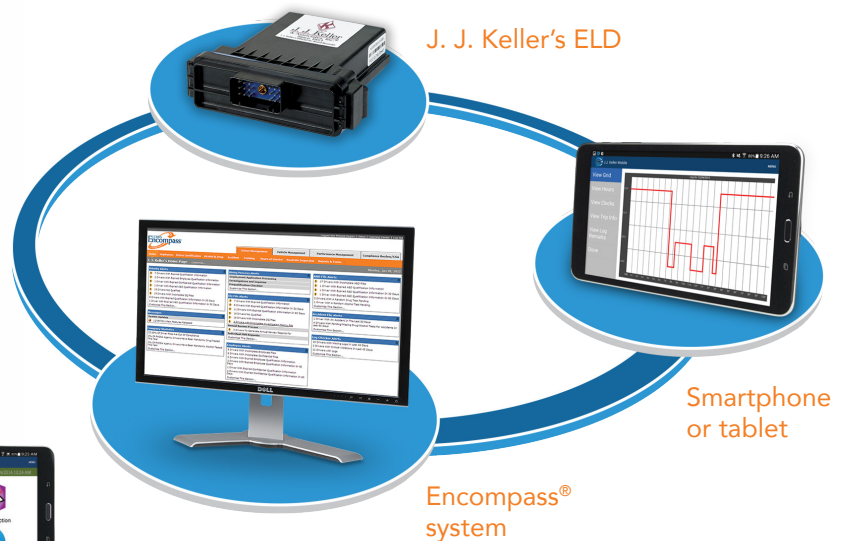

*Improve Hours of Service compliance with the only stand-alone ELog solution*

The **ELogs Edition** of the Encompass® system is for fleets that want to focus on hours of service compliance. Driver logs and inspections are the two areas of compliance most scrutinized and penalized by FMCSA. The Encompass® system provides sound management tools to reduce

inspections, fines, and CSA scores. Driver duty status and vehicle inspection information are monitored by our system against Parts 395 and 396 — ensuring that hours of service recordkeeping is accurate and inspection details are recorded per regulatory requirements.

## Automating HOS Compliance is Easier with Encompass:

- **Low Monthly Cost** — Choose the most experienced HOS compliance provider in the industry for the best ELog-only solution on the market. Use your own smart device to maximize ROI. Simply download the J. J. Keller Mobile® app. Or use the J. J. Keller® Compliance Tablet™ to eliminate the hassle of negotiating a data plan.
- **Reduced Paperwork** — No more filling out a log book! At the touch of a finger drivers log in, do their pre-trip, record their 30 minute break and log off. It's that easy.
- **More Drive Time** — The Encompass® system records drive time by the minute, not in the 15 minute increments drivers have on a paper log grid. Drivers maximize every minute of their driving day.
- **100% HOS Compliant** — No more CSA violations for log duty status "not current." J. J. Keller's electronic logging device (ELD) records drive time and communicates with drivers' smart devices, providing up-to-date HOS reporting. Includes EDVIRs.
- **Instant Access to Available Drive Time** — Anytime access to simple pie charts shows how many hours are available to drive. Alerts remind drivers to take a break.
- **Log Auditing** — For electronic logs, scannable logs, and manual entry. Access to unique state and industry rule sets including US Oil Field, Texas Oil Field, Canadian, Federal and more.
- **No Roadside Inspection Hassles** — Roadside Inspection Mode locks out unrequired data and allows the driver to show only the current and previous seven days of logs.
- **Optional Automated Fuel Tax Reporting** — Save time with J. J. Keller's ELD. It automatically collects GPS data for miles driven in each state and province. Quarterly fuel reports completed by quick data import.

### Your Encompass® ELogs subscription includes:

- **Learning Center** — Feature documents and webcasts covering key regulatory areas.
- **Dashboard Alerts** — Immediately identify compliance areas requiring attention.
- **Customized Reporting Templates** — Based on company locations, driver and unit types, and more.
- **Upgrade Options** — Allow you to add compliance and performance features as your company's needs change.
