

ELD PARTNER PROFILE

Integrated Production Services

Houston, TX

OIL & GAS SUPPLIER | 807 UNITS | 207 DRIVERS | MIXED FLEET | 16 LOCATIONS

“Encompass has had a huge impact on our CSA scores. Every time these guys log in and do what they’re supposed to do, they aren’t getting citations for violations.

That saves us money and improves our scores.”

— BRIDGETTE SINCLAIR, DOT COMPLIANCE SPECIALIST

Integrated Production Services is North America’s leading provider of coiled tubing, nitrogen, and plunger lift services and products, and has one of the largest coiled tubing (CT) fleets in the country. As the DOT Compliance Specialist for Integrated Production Services, Bridgette Sinclair is responsible for keeping their drivers and trucks compliant. J. J. Keller® **Encompass® fleet management system with ELogs** helps her do just that.” This year we earned a satisfactory rating from the FMCSA. J. J. Keller’s **Encompass with Elogs** played a big part in that accomplishment.”

WINNING OVER DRIVERS

Initially, some drivers were reluctant to implement ELogs, but that quickly changed, as Bridgette noted: “We went from drivers not even knowing how to fill out a paper log to using ELogs. The J. J. Keller® **Encompass® fleet management system with Elogs** is user-friendly, and their support team is always available to help. Drivers who easily understood and utilized the technology took the lead to help those who struggled. Now, our drivers never want to fill out a paper log again.”

EFFICIENCY GAINS

Bridgette has also seen results in other aspects of the company’s day-to-day operations. “With **Encompass**, I’m able to look at everything in real time. It makes it easy to see which drivers have hours available and can be sent on a route, increasing our ability to utilize resources efficiently. It has also streamlined the workflow and cut down on the time it takes our administrative staff to get their jobs done.”

The company also uses **Encompass with Elogs** to handle their driver qualification files. “Having the files electronically means we can review them anytime, anywhere. If someone is not in compliance, I get email alerts and can manage it from one location, which is great since we have 16 locations across the country and over 500 drivers.”

COMPLIANCE = SUCCESS

Bridgette enjoys her compliance work in the challenging oil and gas field. “I enjoy being in this industry. The challenge of keeping this many drivers in compliance is rewarding. And using the products J. J. Keller provides makes the difference. Compliance and safety equals success. In this industry, your CSA score can determine if you get the job or not. We strive to keep our employees safe and in compliance with the FMCSRs.”

We’re proud to call Integrated Production Services a compliance partner, and we celebrate Bridgette’s success.

Where will you take your company?
