Dear [Carrier Name],

A review of [Insert Motor Carrier Name]'s safety data shows a lack of compliance with motor carrier safety regulations and suggests that your safety performance has fallen to an unacceptable level in the area(s) of [List of BASICs Above the Threshold]. The purpose of this letter is to: 1) inform you of your company's current safety performance; 2) explain how you can view your safety record and correct it if it contains erroneous data; and 3) describe what actions may be taken in the future if your safety performance does not improve.

This review and notice was based on the roadside inspection and crash performance of [Carrier Name]. Based upon this review, the Federal Motor Carrier Safety Administration (FMCSA) will continue to assess the regulatory compliance of [Carrier Name] on a monthly basis. FMCSA will also evaluate your safety performance through increased roadside inspections that target your company's performance area(s).

You are encouraged to visit the website http://ai.fmcsa.dot.gov/ to review your company's record. This website also contains instructions for requesting corrections to information that you believe to be incorrect. A password will be required to view your company information. Instructions to obtain a password are found on the website.

We urge you to take this warning letter seriously and improve your safety record. Failure to improve your company’s safety performance will result in further investigation of your safety management practices, which may include requests for additional data through offsite or onsite interventions. Continued poor safety performance will result in penalties/sanctions, which could include civil penalties, suspension and/or revocation of State vehicle registration and revocation of your company’s operating authority. Further, your operating record is available to other parties, which include shippers, brokers and insurance companies.

You can visit the FMCSA website at http://www.fmcsa.dot.gov/ to receive information about motor carrier safety rules and regulations. If you have additional questions regarding this matter or need assistance, please contact one of the following:

Sincerely,

Joseph P. DeLorenzo
Director, Office of Enforcement and Compliance
Warning letters are an important part of the Compliance, Safety, Accountability (CSA) interventions process. They provide early contact with carriers who have identifiable, but not yet severe, safety problems. A motor carrier representative of one company that received a warning letter in the Operational Model Test advises other carriers to gain a strong understanding of CSA “so they can talk to their office staff; talk to their drivers; lay down the consequences for driver performance; and work to be compliant.” The following are some of the most frequently asked questions about warning letters.

Q. What is CSA?
A. CSA is a Federal Motor Carrier Safety Administration (FMCSA) program designed to improve large truck and bus safety and ultimately reduce commercial motor vehicle (CMV)-related crashes, injuries, and fatalities.

Q. What are warning letters?
A. Warning letters are an important element of the CSA interventions process, which also includes Offsite, Onsite Focused, and Onsite Comprehensive Investigations. CSA’s suite of tools enables Federal and State enforcement staff to select carrier interventions according to the nature and severity of a carrier’s safety and compliance problems. CSA’s array of interventions starts with the warning letter, the earliest contact designed to address the least severe safety problems. The warning letter is designed to make carriers aware of their safety performance issues so they can address these early, before they become habitual and more difficult to correct.

Q. What do warning letters say?
A. Warning letters notify carriers of their safety issues, provide instruction on how to view their safety information online, and warn them that failure to correct safety problems results in future contact by FMCSA. Warning letters will provide motor carriers with an opportunity to examine their data for accuracy and to file any appropriate requests for data review.

Q. Who will get a warning letter and when?
A. Motor carriers that are identified through the CSA Safety Measurement System (SMS) as requiring this first level of intervention will receive a warning letter.
