

The Hazmat Compliance Pocketbook ...

“It’s Like Having A Hazmat Resource Center Right In The Cab.”

Maintaining a relentless focus on safety and compliance, while keeping expenses under control, is a management challenge for companies like Quality Carriers, North America’s largest bulk transportation company. “We have to keep people safe, while still keeping costs at a sustainable level,” says Bob Bonnett, Vice President of Safety & Security. “With the products and service that we get from J. J. Keller, we’re able to accomplish both.”

“When I came to Quality Carriers four years ago, we used J. J. Keller mainly for logbooks. Now we purchase a wide range of J. J. Keller products, like charts, newsletters and placards. **What we buy most are the Hazardous Materials Compliance Pocketbook and the Emergency Response Guidebook.**”

Quality Carriers hires over a thousand drivers every year, and they all go through classroom training and hands-on instruction at the terminals. Drivers receive a Hazmat Pocketbook and ERG during initial and refresher training, and new ones are distributed as major changes occur.

“Even experienced drivers have hazmat questions. This book gives them the answers.”

“No matter how much hazardous materials experience a driver may have, the pocketbooks and ERGs are an outstanding resource,” Bob observes. “**During training, the pocketbooks and ERG help reinforce how complex hauling hazmat is. They give drivers the information for taking proper safety steps at every trip, making sure that the vehicle and paperwork are in compliance, and responding properly if an accident occurs.**”

When drivers get a bill of lading, they’re expected to check shipping papers and have customers fix irregularities before they leave with the load. The pocketbook gives them a quick and easy source of reference when questions arise.

Bob credits much of Quality Carriers’ safety success to the support he gets from J. J. Keller. “**My customer service rep provides great value to my company,**” he says. “Through her regulatory and compliance knowledge and incredible response time, she’s like another member of my safety team. She works with a number of people here in our organization, and they all think she’s incredible.”

Bob realizes that managing safety and regulatory compliance in the midst of changes like CSA 2010 will continue to challenge his company’s safety team. He’s ready to meet those challenges through his partnership with J. J. Keller. “**J. J. Keller has a long history in the safety and compliance industry,**” he says. “So we know that they’ll continue to be there for us in the future.”

Hazardous Materials Compliance Pocketbook

The *pocketbook* helps drivers use the Hazmat Table to get answers to questions like these:

- ✓ Does the proper shipping name exist in the Table and is it worded correctly?
- ✓ Does the proper shipping name match up with the correct identification number?
- ✓ Is the shipment labeled correctly?

Expanded table of contents and quick-find “tabbed” pages help drivers access information quickly.

4" W x 6" L. Softbound. 592 pages.

HZ-122-ORS

100-149 ... \$3.85 ea.

50-99 \$4.09 ea.

25-49 \$4.15 ea.

ISBN 978-1-60287-517-3

Reprinted every month with the most-current regs.

Covers:

- ✓ Materials of trade
- ✓ Limited quantities
