SUPPLEMENTARY INFORMATION:

Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315 to grant exemptions from the Federal Motor Carrier Safety Regulations (FMCSRs) (49 CFR part 350 et seq.). FMCSA must publish a notice of each exemption request in the Federal Register (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including any safety analyses that have been
conducted. The Agency must also provide an opportunity for public comment on the request.

The Agency reviews the safety analyses and the public comments, and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305). The decision of the Agency must be published in the Federal Register (49 CFR 381.315(b)) with the reason for the grant or denial, and, if granted, the specific person or class of persons receiving the exemption, and the regulatory provision or provisions from which exemption is granted. The notice must also specify the effective period of the exemption (up to 5 years), and explain the terms and conditions of the exemption. The exemption may be renewed (49 CFR 381.300(b)).

Background

The Commercial Motor Vehicle Safety Act of 1986 (CMVSA) was designed to improve highway safety by ensuring that truck and bus drivers are qualified to drive a commercial motor vehicle (CMV). It provided for removal of the driving privileges of unsafe or unqualified drivers. States issue commercial driver’s licenses (CDLs) to CMV operators, but the CMVSA directed the Federal government to establish minimum requirements for the issuance of a CDL.

Subpart H of 49 CFR part 383 contains the principal requirements governing State testing of applicants for a CDL. Testing must be conducted in such a way as to determine if the applicant possesses the required knowledge and skills (§ 383.133(a)).

Request for Exemption

Minnesota seeks a partial exemption from § 383.133, “Test Methods.” Pursuant to that section, the CDL skills test must be conducted in three parts in the following order: pre-trip inspection, vehicle control skills, and on-road driving (§ 383.133(c)(6)). Minnesota asks that it be allowed to combine the second and third parts (vehicle control skills and on-road driving) and thus reduce the skills test to two parts. It also asks to be exempted from using the American Association of Motor Vehicle Administrators (AAMVA) 2005 Test Model Score Sheet. Finally, it asks to be exempted from the requirement that applicants must pass the pre-trip inspection portion of the exam before proceeding to the balance of the test. Minnesota states that under its proposed approach, it can more efficiently manage the limited space of its test sites and conduct more CDL tests each day. It states that denial of its application for exemption will result in a less-rigorous CDL test and negatively affect motor carriers and drivers. A copy of Minnesota’s application for exemption is in the docket listed at the beginning of this notice.

Request for Comments

In accordance with 49 U.S.C. 31315(b)(4) and 31136(e), FMCSA requests public comment on Minnesota’s application for exemption. The Agency will consider all comments received by close of business on August 31, 2016.

Comments will be available for examination in the docket at the location listed under the ADDRESSES section of this notice.

Issued on: July 22, 2016.

II. Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption for up to 2 years if it finds “such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption.” The statute also allows the Agency to renew exemptions at the end of the 2-year period. The physical qualification standard for drivers regarding hearing found in 49 CFR 391.141(b)(11) states that a person is physically qualified to drive a CMV if that person:

First perceives a forced whispered voice in the better ear at not less than 5 feet with or without the use of a hearing aid; or, if tested by use of an audiometric device, does not have an average hearing loss in the better ear greater than 40 decibels at 500 Hz, 1,000 Hz, and 2,000 Hz with or without a hearing aid when the audiometric device is calibrated to American National Standard (formerly ASA Standard) Z24.5–1951.

49 CFR 391.41(b)(11) was adopted in 1970, with a revision in 1971 to allow drivers to be qualified under this standard while wearing a hearing aid, 35 FR 6458, 6463 (April 22, 1970) and 36 FR 12857 (July 3, 1971).

The 20 individuals listed in this notice have requested renewal of their exemptions from the hearing standard in 49 CFR 391.41(b)(11), in accordance with FMCSA procedures.
