

## 6. Electronic Logs

**What about team drivers?** If you share the same ELD, it has to display the log data for both co-drivers who are logged in. Otherwise, each driver could use their own ELD or their own portable device to connect to an ELD.

### *Submitting Your Logs*

Each day, you are required to review your ELD records and certify that the information is accurate. This must be done immediately after the final required entry has been made for the 24-hour period. You must then submit your ELD records to the motor carrier within **13 days**.

### *Correcting Your Logs*

No one may alter or erase the original hours-of-service information that was collected, but you and other authorized individuals may edit, enter missing information, and add notes to the record. When possible, make corrections before certifying the records. If any edits are needed *after* you've already submitted your logs, you will need to make the edits through the ELD, add notes explaining why the edits were made (unless support personnel already added the notes for you), and then re-certify the record.

A motor carrier can *propose* changes to your logs, but you will need to confirm or reject the changes, make the actual edits, and then re-certify the record(s).

If you are part of a team (signed in as co-drivers) and the ELD assigned any driving time to the wrong driver, you are allowed to reassign the driving time to the correct driver.

## 6. Electronic Logs

### *Malfunctions*

If your ELD malfunctions, you must:

1. Notify the motor carrier in writing within 24 hours;
2. Reconstruct your logs for the current day and the previous 7 days on paper (following the instructions outlined in Chapter 5), unless you can retrieve them from the ELD; and
3. Continue to manually prepare logs until the ELD is fixed, and provide those logs for inspection upon request.

The motor carrier must repair or replace a malfunctioning ELD within 8 days unless an extension is requested.

### *Roadside Inspections With ELDs*

Your log data for today and the prior 7 days must be available for inspection at the roadside, both on a display or printout and as an electronic file.

**Display or printout** — You must either display or print your logs for the officer to review. If your ELD has a display, the officer must be able to view it without entering your vehicle (for example, you may pass the display to the officer).

## 6. Electronic Logs

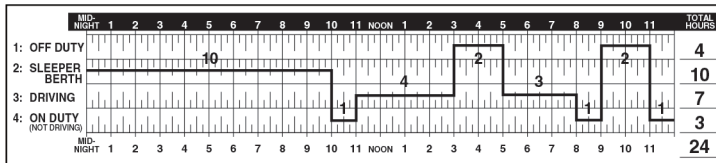

**Electronic file** — Upon request, you must transfer your ELD records to the officer electronically, either through a “telematic” method (email or via a website) or a local transfer method (portable storage device or Bluetooth® technology). The officer will specify which method you should use.

Be sure to have your supporting documents available for inspection as well! The list of required documents can be found at the end of Chapter 5.

The following is an example of a full day’s ELD record as shown on a printout or display for inspection purposes.
