

## QUICK TIPS

### for Eye and Face Protection

1. **Ensure** your eye and face protection are clean and sanitary.
2. **Check** your eye and face protection to see if it's in good repair (e.g., no chips, cracks, scratches, clouding, or breaks).
3. **Inspect** and verify all parts are present (e.g., top shield, side shields, arms, bridge, and straps).
4. **Wear** comfortable, proper fitting eye and face protection. If they don't fit properly, or aren't comfortable, check with your employer for additional options.
5. **Position** your safety glasses correctly and don't obstruct your field of vision.
6. **Verify** that your face shield covers enough area of your face to provide necessary protection from flying particulates.
